Projects:

- | | |
|--|---|
| A meet-up mobile application and usability study | https://github.com/ecsmith/M-E |
| A Node.js Twitter clone with file sharing capabilities | https://github.com/xianc/Warble |
| A beat-maker Android app built with social features | https://github.com/mturley/luper |

Experience

General Assembly: UX Design Immersive Program March 2015-Present

- Covered best practices for User Experience Design during a 10-week, 400-hour immersive program.
- Created 5 projects by applying user-centered design principles.

Cisco: UI/UX Front End Engineer June 2014-Present

- UI/UX Developer in a small agile remote team. Product uses a BackboneJS-based MVC Framework.
- Utilized HTML5, CSS3, JavaScript libraries, automation with Grunt and package management with Bower.
- Experience working effectively using remote meetings and utilizing pair programming with other local devs.

Cisco: Java Developer June 2014-Present

- Developer in a newly formed agile team focused on creating web API's using Java REST architecture.
- Created public customer facing test scripts accessible via our Dev Site (<https://developer.cisco.com/site/wae/>)

People's Market: Co-Manager/Owner January 2012 –May 2014

- Student-owned collective run cooperatively, wherein each co-manager has equal power in business decisions.

MLSC Internship Challenge May 2011- August 2011, May 2012 – August 2012

- Intern at a "Start-Up" Medical Device Company working in the field of Mobile Device Health Monitoring.
- Aided in our first FDA clinical study by collecting data about the test subject's experience with our product.
