

Dear Hiring Representative,

Hi there! My name is Eric Smith. I'm writing you today about your UX Designer role in Brooklyn, NY. I first became interested in this position after speaking with Christopher Lo, a UX Designer at Prolific, during a hiring event at General Assembly in San Francisco, CA. My hopes are that this position at Prolific Interactive would give me the experience and fast-paced lifestyle of a creative agency while helping me to build my skills as a UX Designer.

You may be wondering why I'm looking for work on the otherside of the country. I moved to the Bay Area from my home in Massachusetts about a year ago. Even though I have enjoyed the Bay area, I'm looking to move to a city closer to home. Since my move I have immersed myself the world of UX. Most recently I've been working as a UX Design Apprentice at Perforce Software. At Perforce I've been able to experience Agile UX methodologies at an enterprise-level software company.

I started my apprenticeship directly after graduating the General Assembly UX Design Immersive program. In the short time of 10-weeks, the program covered best practices of the industry through the creation of 5 projects.

Before General Assembly I worked as a UI Engineer at Cisco in San Jose. My position there involved coding web UI in a small agile development team. My time in that role allowed me to develop expertise in HTML5, CSS3, JavaScript.

I'd be happy to speak with you further about my experiences or about more specifics of the position. My resume is included with the application and if you have any further questions don't hesitate to reach out. I am available most readily by phone or email. I deeply thank you for your consideration and time.

Best Wises,

-Eric Charles Smith
